

ABSTRACT

A display including: a display surface (108, 300) for displaying content to a user; a computer system (110) for supplying the content to the display surface (108, 300) for display in a content window (112, 306) on the display surface (108, 300); and a recognition system (128) for recognizing a gesture of a user and defining at least one of a size, location, and content of the content window (112, 306) on the display surface (108, 300) based on the recognized gesture. The display can be a display mirror (108) for reflecting an image of the user at least when the content is not being displayed.

Furthermore, the gesture can be a hand gesture of the user.
